Office of the Secretary

Privacy Threshold Analysis
for the
Personal Property Management System (PPMS)
U.S. Department of Commerce Privacy Threshold Analysis

Office of Administrative Programs/Personal Property Management System (PPMS)

Unique Project Identifier: An EAS OS-059 Application

Introduction: This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based on the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

Description of the information system: Provide a brief description of the information system.

The E-Government Act of 2002 defines “information system” by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: “Information system” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44. U.S.C. § 3502(8).

The PPMS is a web-based COTS system with an Oracle database that is used by eleven of the Department’s Bureaus. The PPMS allows the Bureaus to track and manage its personal property from acquisition through disposal and allow DOC the capability of real-time reporting.

Address the following elements:

a) Whether it is a general support system, major application, or other type of system

PPMS is a Minor System; it is a child system of the EAS Application System Boundary.

b) System location

The system is primarily managed by resources located in the CBS Solutions Center in Gaithersburg, MD. The system is physically located at the Federal Aviation Administration Data Center (DOT/FAA/ESC) in Oklahoma City, OK.

c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)

PPMS has an interconnection with WEX Inc. GSS for the purpose of transmitting unidirectional data communication between these entities. PPMS accesses encrypted data with WEX and retrieves data on a daily schedule. Additionally, PPMS connects with the Census Bureau, NIST, and NOAA information systems. Each of these systems are fully assessed and authorized to operate by the respective Authorizing Officials.
d) **The purpose that the system is designed to serve**

Personal Property Management System (PPMS) provides Department of Commerce (DOC) with a mechanism to ensure uniformity within and across the agency in the selection and management of personal property, real property, and FLEET property.

e) **The way the system operates to achieve the purpose**

Personal Property Management System (PPMS) provides Department of Commerce (DOC) with a mechanism to ensure uniformity within and across the agency in the selection and management of personal property. PPMS provide the critical information that DOC decision-makers require to purchase, transfer, dispose/excess, and depreciate personal property. Sunflower Systems offer an integrated software suite that provides property managers the ability to monitor, control and account for all property transactions. Sunflower’s mobile solutions for receiving physical inventory, shipping, and excess management simplify property processes by bringing asset data to a handheld device. Sunflower Assets System controls asset management tasks by managing physical and financial accountability in a single web-based system. Portable scanners are utilized in international offices to allow a user to modify an asset. The scanners connect to the user’s desktop which allows them to access the record associated with a piece of property. The user then enters the information into the database. The DOC has implemented a Fleet Management Information System to manage its fleet of approximately 3,000 vehicles worldwide. Most vehicles are already entered in DOC’s Sunflower Personal Property Management System (PPMS), to track them as personal property assets. DOC also owns the Sunflower Federal Automotive Statistical Tool (FAST) Solution. Sunflower’s standard functionality coupled with the FAST Solution provides the Department with the necessary software components to implement a Fleet Management Solution. PPMS also fulfills all Federal government regulations for Real Property. These business rules and regulations are established by the General Services Administration (GSA), the Federal Real Property Council (FRPC), and the General Accounting Office (GAO). These rules and regulations address GSA rent, depreciation, clean-up amortization, deferred maintenance, and annual reporting of real property. PPMS provides the Department of Commerce (DOC) with an automated data management inventory system for its real property holdings. It was designed to promote improved real property accountability and to assist in the more efficient and economical use of the DOC’s real property assets.

f) **A general description of the type of information collected, maintained, used, or disseminated by the system**

PPMS collects transactional information from federal employees and contractors/associates in connection with their working relationship with BEA, BIS, Census, EDA, ESA, ITA, MBDA, NIST, NOAA, NTIA, and NTIS.
g) **Identify individuals who have access to information on the system**

Access to PPMS information is granted to authorized DOC users responsible for ensuring uniformity within and across the agency in the selection and management of personal property.

h) **How information in the system is retrieved by the user**

Users can account for and manage their assets from time to time of acquisition through disposal. A complete history is maintained as records are easily updated to reflect any changes (location, user, value, etc.). Users may also generate reports to view assets. Once assets are disposed and a final event is created, a history of assets remain in the system for reporting purposes in the future.

i) **How information is transmitted to and from the system**

Data is transferred into the DOC enclave and assimilated to the PPMS Development, Test, and Production environments. For the data connection with CitiBank, data is pulled from an SFTP staging folder for PPMS. On a daily basis, a PPMS job will automatically pull the text files from the secured SFTP server via SSH connection.

**Questionnaire:**

1. **Status of the Information System**

1a. What is the status of this information system?

   ___ This is a new information system. *Continue to answer questions and complete certification.*

   ___ This is an existing information system with changes that create new privacy risks. *Complete chart below, continue to answer questions, and complete certification.*

### Changes That Create New Privacy Risks (CTCNPR)

<table>
<thead>
<tr>
<th>a. Conversions</th>
<th>d. Significant Merging</th>
<th>g. New Interagency Uses</th>
</tr>
</thead>
<tbody>
<tr>
<td>b. Anonymous to Non-Anonymous</td>
<td>e. New Public Access</td>
<td>h. Internal Flow or Collection</td>
</tr>
<tr>
<td>c. Significant System Management Changes</td>
<td>f. Commercial Sources</td>
<td>i. Alteration in Character of Data</td>
</tr>
<tr>
<td>j. Other changes that create new privacy risks (specify):</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

___ This is an existing information system in which changes do not create new privacy risks, and there is not a SAOP approved Privacy Impact Assessment. *Continue to answer questions and complete certification.*

___X___ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment. *Skip questions and complete certification.*
1b. Has an IT Compliance in Acquisitions Checklist been completed with the appropriate signatures?

- [ ] Yes. This is a new information system.
- [ ] Yes. This is an existing information system for which an amended contract is needed.
- [ ] No. The IT Compliance in Acquisitions Checklist is not required for the acquisition of equipment for specialized Research and Development or scientific purposes that are not a National Security System.
- [ ] No. This is not a new information system.

2. Is the IT system or its information used to support any activity which may raise privacy concerns?

NIST Special Publication 800-53 Revision 4, Appendix J, states “Organizations may also engage in activities that do not involve the collection and use of PII, but may nevertheless raise privacy concerns and associated risk. The privacy controls are equally applicable to those activities and can be used to analyze the privacy risk and mitigate such risk when necessary.” Examples include, but are not limited to, audio recordings, video surveillance, building entry readers, and electronic purchase transactions.

- [ ] Yes. (Check all that apply.)

<table>
<thead>
<tr>
<th>Activities</th>
<th>Building entry readers</th>
<th>Electronic purchase transactions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio recordings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Video surveillance</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other (specify):</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- [ ] No.

3. Does the IT system collect, maintain, or disseminate business identifiable information (BII)?

As per DOC Privacy Policy: “For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as ‘trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential.’ (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. "Commercial" is not confined to records that reveal basic commercial operations” but includes any records [or information] in which the submitter has a commercial interest” and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.).”

- [ ] Yes, the IT system collects, maintains, or disseminates BII.
- [ ] No, this IT system does not collect any BII.
4. Personally Identifiable Information (PII)

4a. Does the IT system collect, maintain, or disseminate PII?
As per OMB 17-12: “The term PII refers to information that can be used to distinguish or trace an individual’s identity either alone or when combined with other information that is linked or linkable to a specific individual.”

[ ] Yes, the IT system collects, maintains, or disseminates PII about: (Check all that apply.)

[ ] DOC employees
[ ] Contractors working on behalf of DOC
[ ] Other Federal Government personnel
[ ] Members of the public

[ ] No, this IT system does not collect any PII.

*If the answer is “yes” to question 4a, please respond to the following questions.*

4b. Does the IT system collect, maintain, or disseminate Social Security numbers (SSNs), including truncated form?

[ ] Yes, the IT system collects, maintains, or disseminates SSNs, including truncated form.

Provide an explanation for the business need requiring the collection of SSNs, including truncated form.

Provide the legal authority which permits the collection of SSNs, including truncated form.

[ ] No, the IT system does not collect, maintain, or disseminate SSNs, including truncated form.

4c. Does the IT system collect, maintain, or disseminate PII other than user ID?

[ ] Yes, the IT system collects, maintains, or disseminates PII other than user ID.

[ ] No, the user ID is the only PII collected, maintained, or disseminated by the IT system.
4d. Will the purpose for which the PII is collected, stored, used, processed, disclosed, or disseminated (context of use) cause the assignment of a higher PII confidentiality impact level?

Examples of context of use include, but are not limited to, law enforcement investigations, administration of benefits, contagious disease treatments, etc.

___ Yes, the context of use will cause the assignment of a higher PII confidentiality impact level.

___ No, the context of use will not cause the assignment of a higher PII confidentiality impact level.

If any of the answers to questions 2, 3, 4b, 4c, and/or 4d are “Yes,” a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the SAOP approved PIA must be a part of the IT system’s Assessment and Authorization Package.
CERTIFICATION

**X** The criteria implied by one or more of the questions above apply to PPMS and because of this applicability, a PIA will be performed and documented for this IT system.

_____ The criteria implied by the questions above do not apply to PPMS and because of this non-applicability, a PIA for this IT system is not necessary.
